Agency Acronym: DPI

Agency Number: 255

Priority: High

Intent:

This replaces an earlier request (BB0299, longitudinal data system) Create an annual GPR appropriation in DPI, program 1, to develop and implement a longitudinal data system under Chapter 118.

Under Chapter 118, require the State Superintendent to develop or adopt a student information system, which will collect and maintain detailed data that provides multi-year academic performance, and other school-related non-academic and demographic information for each public school pupil and that can aggregate these data by teacher, school and school district.

Require the State Superintendent to work with the Office of the Governor to develop the student information system. For the release of the amounts in the appropriation created under this section, require the State Superintendent to submit an annual plan to the Governor for the expenditure of funds. Beginning in fiscal year 2012-13, require the plan to be submitted to the Governor by May 1 of the fiscal year preceding the fiscal year in which the funds have been appropriated. Require the Governor to annually approve the plan as a condition for the release of the funds.

It should be identical. I assume the administration wants to be on the same page as the authors of SB2.

On to another issue. For draft 1279/2, pupil information system, there should be a new provision authorizing DPI to charge school districts for using the student information system. Revenues received from those charges would be allocated to 20.255(1)(jm). I talked with DPI regarding where the funds should go. We picked (1)(jm), hoping it's generic enough that we wouldn't have to create a new appropriation.

Based on discussions we had with DPI, once this system is implemented, school districts are likely to use the state's Student Information System in place of their own existing data systems (in fact, per DPI, a number of larger districts have contracts for data systems that will be ending during the next biennium).

In addition to the cost of creating/purchasing the system (what the current draft language and new appropriation addresses), there will be ongoing costs to operating the system. Since school districts will be using the system, the intent is to have them pay for it. Therefore, the draft should include a provision requiring DPI to charge school districts on a per pupil basis for using the system. For example, if the system were used by all school districts and cost \$8 million to operate, DPI would charge districts \$9.42 per pupil (assuming 850,000 pupils). Those fees would be deposited in appn (1)(jm).

The goal here is to have ongoing costs paid for by school districts and not the state.

PRIMARY AND SECONDARY EDUCATION

This bill directs DPI, working with the office of the governor, to establish a student information system to collect and maintain information about public school pupils, including their academic performance and demographic information, aggregated by school district, school, and teacher. DPI may not spend any moneys appropriated for the system unless its annual expenditure plan is approved by the governor. The bill requires DPI to charge a fee to any school district that uses the system and authorizes DPI to charge a fee to any other person that uses the system.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.
